SPAAAAACE! SCAVENGER HUNT

Thank you for participating in the Hubbard Free Library photo scavenger hunt!

Complete each task, take a picture and tag the library's Facebook or Instagram account, (@hubbardfreelibrary). Be sure to add #HFLSpaceScavengerHunt (after using the tag once, it should be 'saved' so you won't have to type it over and over again). Hubbard Free Library will share our favorite pictures on our Facebook and Instagram accounts.
The person with the most participation (one per social media account) will win a prize.

This scavenger hunt will start on June 2 and then run the length of HFL Summer Reading program (June 22-August 10).

Week 1: June 2-8
You're a star! Pose as a constellation and share the results.

Week 2: June 9-15
Using food, show us the different phases of the moon.

Week 3: June 16-22
Strut your stuff! We all want to see your finest moonwalk.

Week 4: June 23-29
Remember that time you were abducted by aliens? Neither do we. But could you show us how it happened? We're very curious.

Week 5: June 30-July 6
Hey, are you a time traveler? Yeah, that's what we thought. If you're really from the future, why don't you take a picture of your cool time-traveling machine?

Week 6: July 7-13
A long time ago, in a library far, far away ... reenact your favorite scene from *Star Wars* and share it with us.

Week 7: July 14-20
Take a picture with a robot. Can't find a robot? Well, I guess you're going to have to build one. Make sure that it follows the Three Laws of Robotics, and then take a picture with it.

Week 8: July 21-27
Getting into space isn't easy. You need a whole lot of technology and scientific expertise. Speaking of technology, you wouldn't want something terribly out of date in your spaceship, right? No! Find the oldest piece of technology that you can, and take a picture of it. That way you'll remember to never put it in your spaceship.

Week 9: July 28-August 3
Show us your favorite science fiction fandom! Some examples include *Doctor Who*, *Star Wars*, *Star Trek*, *Cowboy Bebop*, *Voltron*, *Dune*, etc.

Week 10: August 4-10
Design a solar system, but with people as planets. Bonus points for including moons (which don't have to be people ... a moon isn't a person)!
